

YOUR SAFETY IS OUR # 1 PRIORITY

The health and safety of our patients and dental team is our top priority. We offer the best treatment alternatives and technology to ensure your safety and comply with the most recent CDC safety guidelines.

Waterlase dental laser provides a safe alternative to the dental drill which uses more water and creates more aerosol spray. Waterlase procedures are faster, gentler, and have faster recovery times.

- Minimally invasive, patient-friendly procedures
- Less pain and faster healing time
- Less usage of anesthetic for most procedures
- Single-visit treatments, eliminating referrals and specialist visits in many cases
- More relaxing dental care experience
